

MUHAMMAD HAMD

Full-Stack AI Engineer · Agentic AI & LLM Systems

Karachi, Pakistan | +92 325 1452080 | muhammadhamdali572@gmail.com | hamdali.com | linkedin.com/in/muhammadhamd | github.com/Muhammadhamd

Full-stack AI engineer who ships agentic AI products from zero to production. I own systems end to end: architecture, LLM and RAG pipelines, scalable backends, cloud deployment, and the UIs that make complex AI usable. I work fast in ambiguity, stay on the pulse of new models and frameworks, and care about cost-efficient systems that actually hold up in production. Founder of WatBot and SelfBrand, currently building agentic knowledge systems at MindKeepr.

EXPERIENCE

Full-Stack AI Engineer Feb 2025 – Present
MindKeepr · Tallinn, Estonia (Remote)

- Architect agentic AI pipelines with Retrieval-Augmented Generation (RAG) for an AI knowledge-retention platform.
- Built an MCP client so users can connect MindKeepr to their own AI assistants (Claude, OpenAI, and others) and query their knowledge base directly.
- Build reliable, full-stack systems end to end, from data ingestion and vector search to the product UI.
- Integrate Jira, GitHub, Confluence, and Google Workspace to auto-sync data into a unified employee knowledge base.
- Tune retrieval quality and prompt strategy to keep answers grounded, fast, and cost-efficient at scale.

Full-Stack & Agentic AI Engineer May 2024 – May 2025
Cubitrek · Karachi, Pakistan

- Built autonomous agentic workflows in Python and integrated Anthropic's Model Context Protocol (MCP) for multi-agent, cross-platform orchestration.
- Built aio.cubitrek.com, an AI-powered platform that helps organizations write SEO and AEO-friendly content in their niche, track their AI visibility, and monitor AI-bot traffic hitting their site through agentic analytics.
- Built MedixExm, a CRM chatbot that automates patient and lead conversations and surfaces records from the CRM in real time.
- Fine-tuned and deployed LLMs (OpenAI, Mistral, Llama 3.2) for custom AI-driven business solutions.
- Shipped production services on AWS (EC2, S3, ECR), containerized with Docker and Docker Compose, fronted by Nginx on Linux, with CI/CD pipelines and a real-time Next.js 14 dashboard.

Node.js Developer Dec 2023 – May 2024
VativeApps · Karachi, Pakistan

- Built server-side logic and REST APIs with Node.js and Express, backed by MySQL.
- Implemented real-time features with WebSockets, RabbitMQ message queues, and Google Play in-app billing.

PROJECTS

WatBot 2025 – Present
WhatsApp AI automation platform for support and sales. Core engine in Go (whatsmeow), conversational intelligence on OpenAI APIs, with a React management dashboard. Founder and sole engineer.

SelfBrand.app 2024 – Present
Personal-branding SaaS that automates roughly 80% of content generation for founders and professionals. Next.js + Node.js, AWS S3 for media, Docker deployments, OpenAI APIs for AI-generated content.

Valoov.ai 2025 – Present
AI platform for automated video generation and personalization. Node.js + FastAPI backend, Docker, AWS EC2 with Nginx, and LLM pipelines for script generation and voice synthesis.

AI Voice Customer-Support Agent (Urdu) 2025
Real-time Urdu support agent on OpenAI's Realtime model with an MCP WhatsApp client for voice, text, and calls. Shopify integration via MCP for live inventory and e-commerce responses.

AI-Powered SEO & Content Engine 2024 – Present
n8n-orchestrated workflow combining Selenium scraping, fine-tuned LLMs for summarization, Google Analytics API for keywords, and Tavily for retrieval, with a humanization and refinement feedback loop.

OPEN SOURCE

go-agentsdk github.com/Muhammadhamd
A lightweight Go SDK for building LLM agents with tool-calling and multi-step agent loops.

TECHNICAL SKILLS

AI & Agentic: LLMs (OpenAI, Anthropic, Mistral, Llama 3.2), Agentic workflows, RAG, Vector search (pgvector, Pinecone), MCP (Anthropic), LangChain, LangGraph, CrewAI, Agents SDK, Google A2A, HuggingFace

Languages: Python, Go, TypeScript, JavaScript, Node.js

Backend & Frontend: FastAPI, Flask, Express, WebSockets, Next.js, React, Tailwind CSS, REST APIs

DevOps & Cloud: Docker, Docker Compose, AWS (EC2, S3, ECR), CI/CD, Nginx, Linux, GCP, Azure VMs

Data & Automation: PostgreSQL, MongoDB, MySQL, RabbitMQ, n8n, Selenium, Tavily, Google Analytics API

EDUCATION

B.S. (Bachelor's Degree) · Federal Urdu University of Arts, Science & Technology, Karachi · 2024 – 2029

Intermediate, General · Government Degree Boys College, Anda More · 2022 – 2024

Information Technology · Saylani Mass IT Training (SMIT) · 2022 – 2023
